

Gulfstream® SAVANNAH

APU

REPAIR & OVERHAUL

# The Power of Experience

Maintaining the intricate systems of your aircraft ensures the continued level of performance you require. At Gulfstream, we operate a full range of backshop capabilities all staffed by highly experienced technicians who are dedicated to providing the very best service.

Specifically, at our service facility in Savannah, Georgia, we provide full repair and overhaul of Honeywell Auxiliary Power Units (APU) for Gulfstream and non-Gulfstream aircraft. Designed to provide power when the main engines are not running, your aircraft's APU performs a variety of functions including main engine starting, cabin cooling and electrical power generation.

## APU CAPABILITIES: SAVANNAH, GA

Gulfstream Savannah is a Honeywell Authorized Service Center for the GTC36-100, 36-150 and RE220 series of APUs. The Savannah APU shop is currently performing repairs, inspections, hot section inspections and overhauls to support customers operating aircraft with Honeywell APUs.

Tooling, test equipment and a large inventory of parts are currently in place at the Savannah facility. The APU shop can also provide customers with Borescope Inspections, a device that allows interior access of holes, bores and various cavities on your APU for detailed examination, which is useful when buying or selling any aircraft.

## THOROUGH TESTING FOR OUTSTANDING RESULTS

Currently, Gulfstream possesses numerous rental units as well as an APU Test Cell to complete performance testing on all Honeywell APUs. Once your APU has been repaired, technicians then place it in our Test Cell; a highly advanced technology that allows our technicians to apply extreme conditions to the APU to ensure it is fully operational. This additional measure is just one more way that Gulfstream proves its dedication to you and your aircraft.

## OUR SERVICE COMMITMENT

Gulfstream Savannah will provide customer support, improved efficiency, reduced downtime and improved quality to all Honeywell APU customers on all Honeywell APU models. With more than 30 years of APU experience, Gulfstream APU technicians can help troubleshoot and repair any APU malfunction that may arise.

For questions or to obtain a quote regarding APUs or engine service, please contact any Gulfstream Regional Sales Manager or John Kennedy at 912-965-3767 or visit [www.gulfstream.com/apu](http://www.gulfstream.com/apu).
